READING 1

Last summer, Daniel traveled to Canada for the first time. He stayed in Toronto with a host family for three weeks. During his trip, he visited famous places such as Niagara Falls and the CN Tower. Daniel was nervous at the beginning because his English was not very strong, but his host family was patient and friendly. By the end of his stay, he felt more confident speaking English. Daniel said the best part of the trip was making new international friends at the language school.

1. How long did Daniel stay in Canada?

- A) One week B) Two weeks
C) Three weeks D) One month

2. What does the word confident mean in this context?

- A) Afraid B) Shy
C) Sure of himself D) Confused

3. Why was Daniel nervous at the beginning?

- A) Because it was his first time traveling alone
B) Because he didn't know much English
C) Because his host family was strict
D) Because he got lost in Toronto

4. Which of the following is true according to the text?

- A) Daniel stayed at a hotel in Toronto
B) He visited Niagara Falls and the CN Tower.
C) He only spoke Spanish with his host family
D) He didn't make any new friends

5. What can we infer about Daniel's trip?

- A) He probably wants to return to Canada
B) He didn't enjoy living with a host family
C) He preferred sightseeing to studying
D) He decided not to continue learning English

6. What was Daniel's favorite activity during his trip to Canada?

- A) Visiting the CN tower
B) Going skiing
C) Eating poutine
D) Taking English classes

READING 2

Many scientists believe that honeybees are essential for the survival of ecosystems. These insects pollinate a large variety of plants, including many that humans depend on for food. However, in recent years, bee populations have declined dramatically. Researchers suggest several causes: pesticides, climate change, and the loss of natural habitats. The decline of bees is alarming, not only for the environment but also for global food security. Some organizations are creating programs to protect wildflowers and reduce pesticide use, hoping to give bees a chance to recover.

1. According to the text, why are honeybees considered essential?

- A) Because they produce honey for human consumption
B) Because they pollinate plants necessary for food production
C) Because they adapt easily to climate change
D) Because they are protected by international laws

2. What is the author's main purpose in this passage?

- A) To entertain readers with stories about bees
B) To persuade readers to avoid eating honey
C) To inform readers about the threats bees are facing
D) To describe the life cycle of bees in detail

3. The phrase "give bees a chance to recover" suggests that

- A) Bee populations can improve if protective measures are taken
B) Bees can recover naturally without human help
C) The situation of bees is not very serious
D) Bees have already recovered from previous declines

4. Which factor is not mentioned as a cause of bee population decline?

- A) Pesticides
B) Loss of natural habitats
C) Diseases caused by parasites
D) Climate change

5. What can be inferred about the relationship between bees and humans?

- A) Humans are not affected by the decline of bees
B) Human food production depends partly on bees
C) Humans can easily replace the role of bees with technology
D) Humans protect bees mainly for cultural reasons
